It's necessary to learn there're 4 phases within data recovery cases and if users want to offer comprehensive data recovery services or have ability to fix different data recovery cases, users need to be equipped with corresponding knowledge and tools for different phases.

The 4 Data Recovery Phases

PHASE 1: REPAIR THE HARD DRIVE

PHASE 2: IMAGE THE DRIVE TO A NEW DRIVE

PHASE 3: LOGICAL RECOVERY OF FILES, PARTITION, MBR, AND MFT.

PHASE 4: REPAIR THE DAMAGED FILES THAT WERE RETRIEVED

***Within Data Recovery Phase 1-Repair The Hard Drive**

**** Tools To Repair Physically Damaged Hard Drives Such As Head Damage, Motor Stuck**

Tool 1: HDD Head Combs Pro.-Used for head swap

Price: USD179 Shipping Cost: USD70

Tool 2: Head And Platter Swap Pro.Standard-Used for head and platter swap

Price: USD399 Shipping cost: USD70

Tool 3: Head And Platter Swap Pro. Advanced-Used for head and platter swap

Head And Platter Swap Pro. Advanced has improved performance on security control, efficiency and precision on the platter exchangers. Head And Platter Swap Pro.Advanced is the most cost-effective head and platter swap tools.

Difference between the Head & Platter Swap Pro Standard and Advanced version
Head And Platter Swap Pro.Advanced makes a great improvement on head and platter swap pro. standard for the key physical component included in the package-platter exchangers. The two 2.5" and two 3.5" platter exchangers are upgraded for users to swap the platters more easily with better security control. So the difference between standard version and advanced version is on the platter exchangers.

Price: USD550 Shipping cost: USD70

Tool 4: HDD Repair Microscope 40X-Used for precise diagnosis & recovery procedures.

Professional

HDD Repair Microscope

Price: USD250 Shipping cost: USD70

**** Tools to repair firmware damaged hard drives**

This is so far the most powerful WD hdd firmware repair tool with many new functions no other firmware repair tools have.

Price: USD610 Shipping Cost: USD70

Dolphin Data Lab is manufacturing other new hdd repair tools for other hdd brands such as Seagate, Samsung, Toshiba with new technologies and going to release them within the first half year of 2013.

- *Within Data Recovery Phase 2-Image the patient drive to a new drive
- *Within Data Recovery Phase 3-LOGICAL RECOVERY OF FILES, PARTITION, MBR, AND MFT

Tool 6: DFL-DE data recovery tool-used within Data recovery phase 2 and phase 3.

Price: USD1999 including shipping cost

Within PHASE 4-REPAIR THE DAMAGED FILES THAT WERE RETRIEVED

Within this phase, this usually requires specialized data repair tools to repair different file types. Anyway, over 90% users can recover from the patient drives are good and some damaged files cannot be repaired at all. The amount of damaged files sometimes depends on the performance of the hdd repair tools and data recovery used within data recovery phase 1, 2 and 3.

Usually clients can buy some software tools to repair the damaged files.

For one professional and comprehensive data recovery center, users are usually required to have a wise selection and combined purchase from different data recovery tool manufacturers.

And usually a combination of the data recovery and hdd repair tools within the phase 1-3 is good enough to start a professional data recovery business and make something there in this field.

Shipping terms

Shipped by DHL express or Fedex Express depends on the location of the clients. It takes 4 or 5 working days to reach the clients.
